

**ABSTRACT OF THE DISCLOSURE**

This invention relates to a cosmetic brush assembly. The cosmetic brush assembly has a brush member, which may be inserted in a case or pulled out from that by the open and close action of a protection cap. Further, the total length of the cosmetic brush assembly may be changed according to the movement of the brush. Therefore, a user  
5 may easily reserve the cosmetic brush assembly in a bag or use it for painting with cosmetic powder.
